Dear AHF Member:

We are pleased to present the Winter 2020 edition of the AHF Business Partner Directory!

This is a Directory of all AHF Business Partners that have committed to year-long and virtual conference sponsorships and support of AHF for 2020.

The Business Partner Directory is searchable by product line category, as well as by Business Partner name. Included in this edition is the name for each Business Partner's point of contact, their email address and company website.

The intent of our Business Partner Directory is two-fold:

**1. Make life easier for AHF Members.** This Directory outlines products, services and equipment offered by our Business Partner members. AHF's Business Partners include some of the most innovative, competitive and trusted companies in the world. These are people and companies that allow us, self-operated facilities, to do our very best work.

**2. Support the companies that support AHF.** We encourage all Operator Members to review this Business Partner Directory and utilize this resource as a guide when you're considering your purchases for your facility. AHF Business Partners have made sizeable investments in AHF and they appreciate your year-long support.

Thank you for your support and commitment to AHF—we are a volunteer-run organization that depends on its amazing members to realize our mission of supporting the self-operated healthcare industry.

We invite you to thank AHF Business Partners by reaching out to the companies in this Directory! We are certainly in challenging times and our business partners have expertise in areas that are critical to our success.

Sincerely,

**Ryan Conklin**  
AHF President

**Eric Eisenberg**

Healthcare Foodservice Operations flow  
**safely** with **KITCHENS TO GO®**

From planned renovations to unplanned situations, healthcare foodservice operators must focus on cooking and serving patients, staff, and visitors without interruption while also maintaining quality. Since COVID-19, new protocols call for elimination of self-service, pivoting operations to takeout and grab & go, and the creation of makeshift grocery stores in cafes.

Kitchens To Go® provides comprehensive mobile, modular, and containerized commercial kitchens that can assist to create safe workplaces and kitchen spaces. In addition to cooking capacity, cold and frozen storage, ware washing, dining space, restroom, and office facilities can be provided. These flexible facilities are code compliant, scalable, and readily convertible to meet the changing needs of social distancing.

Interim foodservice facilities from Kitchens To Go® keep you cooking.

## THANK YOU HEALTHCARE FOODSERVICE HEROES

Ensuring hospital-wide safety is a priority for all healthcare foodservice professionals. We understand how crucial it is to provide optimal care for patients, especially during the COVID-19 crisis.

We want to thank all of you on the front lines of this fight for your efforts to serve our communities.

You are true **HEROES!**

## Improve Data Management for Healthcare Foodservice with **BIG DATA ANALYTICS!**

Effective data management is critical for operational analysis, especially during a pandemic, which can create a surge in financial pressures on the healthcare industry.

Computrition introduces **DataArc** to help hospitals and health systems make **data-driven decisions**, streamlining financial planning, budgeting, and forecasting initiatives through integrated data warehousing technology.

Bridging data between foodservice and a data warehouse provides insights to:

- Increase utilization of foodservice software
- Update food safety measures
- Control food costs
- Streamline retail throughput

**Automate**  
reporting with  
integrated data  
warehousing

**Analyze**  
historical trends  
and operational  
patterns

**Advance**  
the supply chain  
through data-driven  
decisions

## **We're Here to Serve.**

It's safety as usual for us at BSI. It's our focus, because we know it's yours as well. The food and nourishment you provide is at the core of healing for the patients, visitors and staff you serve. And there's no way to provide healing, without the security of knowing that the food you serve is safe.
